INDEX TO VOLUME V.

GENERAL ALPHABETICAL INDEX.

Entries from the Synopsis of Periodical Literature are indicated by S; from the Analysis of Current Electrochemical Patents by A; from the Digest of Electrochemical Patents prior to July, 1902, by D; from Recent Metallurgical Patents by M. Illustrated articles are indicated by *.

A

ABBE Engineering Co.....286, 422, 429
Accumulators. (See Storage Battery.)
Acid-proof brick and tile..... 473
Acker Process Co.....69, 106
Ados recorder 107
Adsorption. Patten 225
Air. Liquid *426
Alcohol. Ageing. Koch. (A.) 416
——Ageing and sterilizing. Dorn. (A.).. 416
——Aromatic. Mettler. (A.) 239
Allis-Chalmers Co.....*34, 101, 336, 473, 474
Alloys. Research 234
——By electrolysis from fused salts. Kügelgen and Seward. (A.)..... 414
——(See also the different metals; also bronze; also Furnace. Electric. Manufacture of Ferro Alloys.)
Albuminous substances. Treatment. Desgeorge. (A.)..... 379
Alternating current. Physiological effect. Nernst and Reiss. (S.)..... 466
Alternator. Four-year run. General Electric Co. *247
ALUMINIUM:
——Aluminium Corporation, Ltd..... 410
——Alloys with copper. (S.)..... 101
——Alloy. Chamband. (S.) 285
——Alloy. Fletcher. (M.) 426
——carbide. Decomposition. (S.) 31
——in Italy 107, 290
——Plant in Kentucky 106
——Price reduction 513
——Progress in 1906. Richards..... 382
——Reduction of boric anhydride and silica 489
——Removal of sodium from sodium-aluminium alloy. Roberts. (M.).. 284
——Solder. Ellis. (M.) 379
——Soldering. Hall. (A.)..... 196
——Surface properties. Hammer 231
Alundum as abrasive..... 515
Am-, volt-, watt-, hp-meter combined..... *287
American Association Advancement of Science 35
American Blower Co..... 69
American Cyanamid Co..... .....198, 289
American Chemical Society. Toronto meeting 287
American Electric Furnace Co.....290, 335
American Electrochemical Society..35, 41, 106, 116, 153, 159, 162, 203, 217, 292, 300, 381, 387, 390, 429, 435, 479, 490, 515
——New York meeting, report..... *441
——Philadelphia meeting, report..... *217
——New York section.....35, 68, 106
——Philadelphia section 106
——Presidency 490
American Ferrofix Brazing Co..... 69
American Foundrymen's Association, 153, 216, 515
American Gas & Electric Co..... 335
American Gröndal-Kjellin Co.....151, 479
American Institute of Mining Engineers. 118
——Ontario meeting 303
American Institute of Social Service.....37, 244
American Instrument Co.....66, 246
American Museum of Security.....37, 244
American Peat Association..... 429
American Society for Testing Materials.. 256
American Spiral Pipe Works..... 335
American Vanadium Co..... 494
Ammonia from nitric acid. Patten..... 449
——Synthesis of. Nernst 457
ANALYSIS:
——Apparatus and electrode. Guess and Haultain. (A.) 505
——Determination of iron. Van Arsdale. (S.) 99
——Electrolytic. (S.) 466
——Electrolytic. Smith 239
——Electrolytic assaying 197
——Gas. Barnhart *350
—— Philipp 440
——Minute quantities of copper. Free.... *449
——Ore-testing crucible for assayers. Hunsinger. (A.) 473
——Pouring mold for assayers. Bailey.... *242
——Silicon. Albro and Mott..... 445
——Silver bullion 94
—— Clennell. (S.) 147
——Vanadate of iron. Wilson..... 495
Antimony and arsenic ores. Herrenschmidt process. (S.) 32
Argon with calcium cyanamide. (S.)..... 465
Aromatic alcohols. Mettler. (A.)..... 239
Arsenic. Alloys with iron. Friedrich. (S.) 191
——and antimony ores. Herrenschmidt process. (S.) 32
——compounds of lead. Vreeland. (A.).. 505
——Nickel-arsenic alloys. Friedrich and Bennigson. (S.) 423
Assaying. (See Analysis.)
Atomic weights. Branner, Bernoulli..... 457
Atoms. Disintegration of. Voller, Marckwald, Meyer, Lerch, Hahn, Levin, Tammann 456

B

BALANCE. Voland & Sons..... *63
Ball filling for sulphuric acid towers..... 151
Batteries. (See Storage Battery, Primary Battery.)
Berthelot 113
——By Doremus *182
Bertuch, Fred, & Co. 107, 151
Bessemer converter. (See Converter.)
Bichromates. Electrolytic. Suchy. (A.). 32
Billitzer, J. 106
Bismuth. Refining. Mohn *314
Blackwell, Geo. G., Sons & Co..... 69
Blast. (See also Furnace, Metallurgical.)
——Dry-blast at Pottstown 290
——Gayley dry-blast. Nagel 202
——Hot-Blast. Munson. (M.) 193
——Hot-blast stoves. Lürmann. (S.)..... 281
Blasting machine. Bowman. (A.)..... 420
Bleaching cotton. Vogelsang. (A.)..... 471
——flour. Alsop 366
——liquor. (See Sodium chloride. Electrolysis.)
——powder. (See Sodium chloride. Electrolysis.)
Blowing engines. Turbo. (S.)..... 32
Blowpipes. (See Welding and Cutting.)
Boiling points of metals. Wedig..... 450

BOOK REVIEWS:
——Alternating-Current Motors. By A. S. McAllister 337
——Annuaire Universel des Mines et de la Metallurgie. By R. Pitaval..... 518
——Chemistry and Technology of Mixed Paints. By Maximilian Toch..... 111
——Commercial Organic Analysis. By Alfred H. Allen 337
——Contributions to Economic Geology, 1906, Part I. By C. F. Emmons and E. C. Eckels 384
——Conversations on Chemistry. By W. Ostwald, Elizabeth C. Ramsay and Stuart K. Turnbull..... 156
——Copper Mines of the World. By Walter Harvey Weed 383
——Corrosion and Protection of Metals. By A. Humboldt Sexton..... 157
——Department of Commerce and Labor, Bureau of the Census. Census Bulletins 482
——Deutsches Patentrecht für Chemiker. Julius Ephraim 252
——Dredging for Gold in California. By D'Arcy Weatherbe 431
——Electric and Magnetic Measurements and Measuring Instruments. By Frank W. Roller..... 250
——Electro-analysis. By Edgar F. Smith. 481
——Electrochemistry—I. By H. Danneel and Edmund S. Merriam..... 202
——Electrochemistry of Organic Compounds. By Walter Löb and H. W. F. Lorenz 482
——Elektrochemische Deutsche Reichspatente. By F. Ferchland and P. Rehländer 111
——Elektrolyse Geschmolzener Salze. By Richard Lorenz 109
——Elektrolytische Alkalichloridzerlegung mit flüssigen Metallkathoden. By R. Lucion 110
——Elektrolytische Chloratindustrie. By John B. C. Kershaw and Max Huth 109
——Electrolytische Verzinkung. By Sherard Cowper-Coles and Emil Abel. 109
——Elektrometallurgie des Eisens. By Bernard Neumann 251
——Elements of Chemical Engineering. By J. Grassmann 433
——Family Motor Tour Through Europe. By Leo H. Balkeland 520
——Fire Assay of Gold, Silver and Lead in Ores and Metallurgical Products. By L. S. Austin 432
——Fire Assaying. By Evans W. Buskett. 249
——Foods and Their Adulterations. By H. W. Wiley 519
——Gypsum and Gypsum Products in 1906. By Ernest F. Burchard..... 385

Buffalo Dental Mfg. Co.....107, 154
Bunsen Society 292
——Hamburg meeting 456
Burgess, C. F..... *217
Burner for cutting metals. Schoop..... *308
——(See also Welding.)

C

CABLES. Drying. Hale. (A.) 240
CALCIUM:
——Manufacture of. (S.).....414, 467
—— Escard 283
——as reducing agent. Perkin..... 276
——for thermit. Goldschmidt 287
——Alloy with magnesium. (A.)..... 414
——Alloy with zinc. Kügelgen and Seward. (A.) 279
——Calcium chloride from pickling iron, for paint 395
Calcium nitrate as fertilizer..... 375

CALCIUM CARBIDE:
——Manufacture. Hartenstein. (A.) 102
—— Willson. (D.) 154
—— Whitehead, Dickerson, Clarke, Boehm. (D.) 198
—— Willson, Clarke. (D.)..... 248
—— King, Wyatt, Willson. (D.)..... 292
—— Eldridge, Hewes, Whitney, Morehead, Roberts. (D.) 336
—— Petersson. (A.) *377, 378
—— Roberts, Blum, Clark, Heath, Fahrney, Cowles. (D.)..... 382
—— Morehead. (A.) *412
—— Hartenstein, Hewes. (D.) 430
—— Hewes, Wilson. (D.) 480
—— Wilson, Wood, Roberts. (D.)..... 516
——Decomposition. (S.) 31
——in Ireland 290
——Ferro-calcium carbide. Misko. (A.).. 470

CALCIUM CYANAMIDE:
——General.....72, 198, 289, 374, 479
——Carlson. (S.) 98
——Erlwein 59, *77
——Foerster and Jacobi..... 464
——Bredig 465
——Argon. (S.) 465
Calculations. Metallurgical. Browne... *174
—— Richards....11, 44, 79, 129, 165, 212, 266, 304 352, 398, 458, 496
Canadian Mining Institute. Toronto meeting 117
Carbides. Decomposition by reagents. (S.) 31
——(See also Calcium carbide and the other carbides.)

CARBON:
——in electrometallurgy. FitzGerald and Forssell 229
——crucible. Mueller. (S.)..... 466
——for resistors. Rivers. (A.)..... 55
—— granular. Tucker, Doty, Canchois. 450
——graphitized. Girard and Street..... 236
——Carbon electrodes. Joint. Tone. (A.). 378
—— Möllenbruck and Dielmann.. (A.) 505
—— Shorts. (A.) 141
—— Stubbs. (A.) *471
—— Heat conductivity. FitzGerald..... 451
——Carbon dioxide indicator..... 335
——Carbon dioxide recorder 107
—— Carbon tatrachloride 69
—— Crocker *259
—— Maywald. (A.) 504

CARBORUNDUM:
——Manufacture. Acheson. (D.) 36
—— Acheson, FitzGerald. (D.)..... 70
—— Acheson, Parks, Hunt, Talbot, Engels. (D.)..... 108
——Decomposition. (S.)..... 31
——as reducing agent. Becket. (A.)..... 322
Card index 41
Castings cleaned by sand-blast..... 334
Castner-Kellner Alkali Co., Ltd..... 27
Cathode for mercuric salt solutions. Hatfield. (A.)..... 327
Caustic. (See Sodium chloride. Electrolysis. Caustic and chlorine.)
Cell. (See also Batteries and Tank.)
——Diaphragh. Betts. (A.)..... *239
——Electrolytic. Gravity-Diaphragm cell. Rambaldini. (A.)..... 415
——with three compartments. Findlay. (A.) 194
——(See also the different manufactures. For instance, Sodium chloride. Electrolysis.)
Celluloid substitutes. Desgeorge. (A.)... 379
Cement. Machinery 154
——Zinc dust in 248
Chandler, C. F. *49
Charcoal ovens. Juon. (S.)..... 283
Chemists' Building 74
Chlorates. (See Sodium chloride. Electrolysis. Chlorates.)
Chlorine in metallurgy. Baker..... 448
——(See also the different metals and Sodium chloride electrolysis.)
Christy Fire-Clay Co..... 395
Clark Electric & Mfg. Co..... 197
Clay products 430
Coal. Calculating calorific value. Gontal. (S.)..... 145
——Charcoal ovens. Juon. (S.)..... 283
——Coking of. Keighley. (S.)..... 376
Cobalt. Copper, nickel, cobalt from sulphides or arsenides. Ryan. (A.).. *56
——nickel arsenides. Baker..... 448
——Roasting argentiferous cobalt-nickel arsenides. (S.)..... 147
